#### Features

i-power 14 Li-Ion battery powered, cold sprayer

Lightweight spray nozzle

Faster cleaning time, better coverage

4 colour coded nozzles for multiple applications

Shoulder, back, hand or trolley carried

## i-cover

In light of the current pandemic traditional approaches to disinfecting don't cut it anymore. They are often inefficient, but also ineffective at providing proper dwell times and complete coverage of a disinfectant. The cordless i-cover is an advanced cold mist generator designed to make your disinfecting job fast, efficient, and thorough. Simply fill the tank with our range of eco-friendly and safe liquids, push the trigger and start.

i-cover 1.0

i-cover 2.5

### Two versions

We have two versions of the i-cover: i-cover 1.0 & 2.5. The difference? They have different tank-capacities.

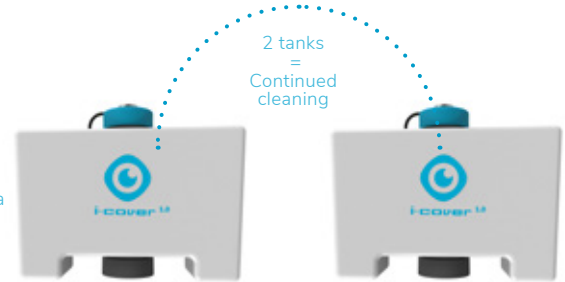

### Wide spray

Better coverage because of specific nozzles, a wide spray fan generates faster cleaning.

### Convertible backpack

Four different ways to configure it by hand, shoulder, back and with a trolley. This guarantees better control and excellent ergonomics for the user.

i-cover 1.0 has a removable tank

### Empty tank

It takes 10 minutes for the tank to be empty of the i-cover 1.0. That equals 150m<sup>2</sup> that is fully covered. In comparison, the competitor takes 9 minutes which equals only 100m<sup>2</sup> that is covered.

### Corrosion resistant

All internal rubber components are chemical and corrosion resistant.

### Charge one battery

Charge a single i-power battery with our new charger.

### Quality stainless steel, nickel plated nozzles

Multiple nozzles provide fine tuned coverage. For fragile objects, use the yellow finest mist nozzle. For indoor applications, use the green fine mist nozzle. For food preparation, use the orange medium mist nozzle. For outdoors and walls, use the blue coarse mist nozzle.

nozzle extension piece

### Cordless Operation

The i-power 14 battery carries an approximate charge of 18 hours for both i-cover versions.

i-cover 2.5

## Technical specifications

### i-cover 1.0

Handle weight	1 kg
Total product weight	7.5 kg
Working reach (to empty tank)	150 m <sup>2</sup>
Running time battery (1 piece)	12 hours (i-power 9) / 18 hours (i-power 14)
Dimensions (l x w x h)	30x23x27 cm
Tank Volume	1 Liter
Extras	2 tanks included, for changing during operation

### i-cover 2.5

Handle weight	1 kg
Total product weight	12 kg
Working reach (to empty tank)	375 m <sup>2</sup>
Running time battery (1 piece)	12 hours (i-power 9) / 18 hours (i-power 14)
Dimensions (l x w x h)	30x25x62 cm
Tank Volume	2.5 Liter
Extras	Integrated backpack and trolley
